DETAILED ACTION

Claim Rejections - 35 USC § 103

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimura in view of Peters et al.

The patent by Yoshimura (JP 06093856 A) shows an engine with a cooling circulation and at least one line having a cooling liquid being intermittently deionized (1).

The cooling liquid is deionized by an ion exchanger (1).

The patent by Yoshimura does not specify that the coolant fluid contains a nonionic corrosion inhibitor. The patent by Peters et al. (4,404,113) teaches that it is well known that coolants containing .1% - 3% of a sulfamide compound acts as corrosion inhibitor for the engine parts. In view of Peters et al., it would have been obvious to anyone skilled in the art who wanted a coolant system with an ion exchanger that reduces corrosion to improve on Yoshimura by providing a coolant fluid with corrosion inhibitors such as a sulfamide compound.

The patent by Yoshimura does not specify the type of ion exchanger, it is the view of the examiner that the type of ion exchanger is an obvious choice of design because no new or unexpected results are achieved by either of the ion exchanger types.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent by Peters et al. (4,404,113) specifically is relevant to the type of coolant fluid.

Response to Arguments

Applicant's arguments filed 10/13/06 have been fully considered but they are not persuasive. It is the view of the examiner that the elements required by the claims are shown. The patent by Peters may include sulfamide compounds for cavitation inhibiting rather than corrosion inhibiting, but the sulfamide compounds are still present.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
